TASK 1	3
TASK 2	4
TASK 3	5
TASK 4	9

TASK 1

1. CODE

```
1 #include<iostream>
2 #include<fstream>
3
4 using namespace std;
5
6 int main(int n,char** arg){
7     string line;
8     fstream file;
9
10    for(int i=1; i<=n;i++){
11        file.open(arg[i],ios::in);
12        if(!file) continue;
13
14        while(getline(file,line)) cout<<line<<endl;
15        file.close();
16    }
17 }
18
```

2. DEMO

```
salman@salman-virtual-machine: ~/lab4
salman@salman-virtual-machine:~/lab4$ g++ -o obj task1.cpp
salman@salman-virtual-machine:~/lab4$ ./obj 1.txt 2.txt
1
2

```

TASK 2

1. CODE

```
1 #include<iostream>
2 #include<string>
3 #include<fstream>
4
5 using namespace std;
6
7 int main(int n,char** arg){
8     fstream file;
9     string line;
10    string value = arg[1];
11    char* filename = arg[2];
12
13    file.open(filename,ios::in);
14    if(!file) exit(0);
15
16    while(getline(file,line)){
17        if(line.find(value)!=string::npos) cout<<line<<endl;
18    }
19
20
21 }
22
```

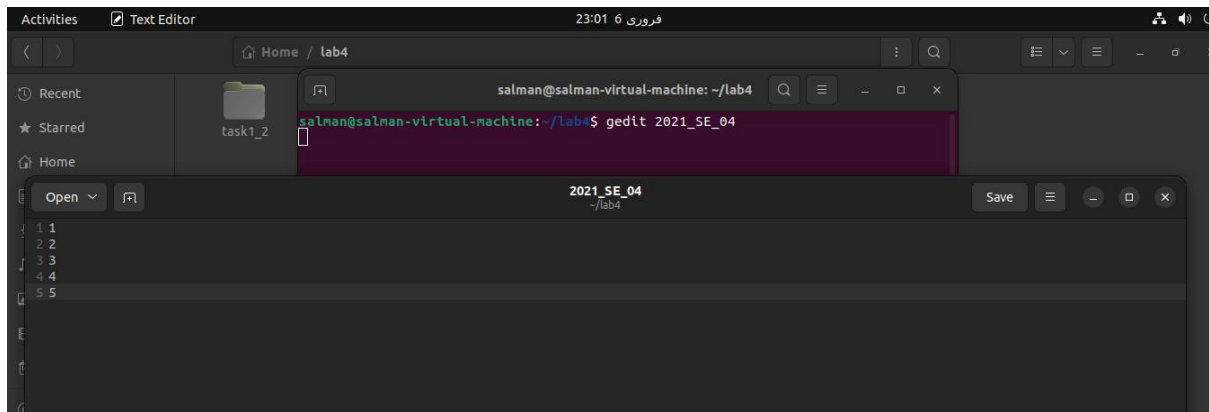

2. DEMO

```
salman@salman-virtual-machine:~/lab4$ g++ -o obj task2.cpp
salman@salman-virtual-machine:~/lab4$ ./obj 4 2.txt
4
14
salman@salman-virtual-machine:~/lab4$
```

TASK 3

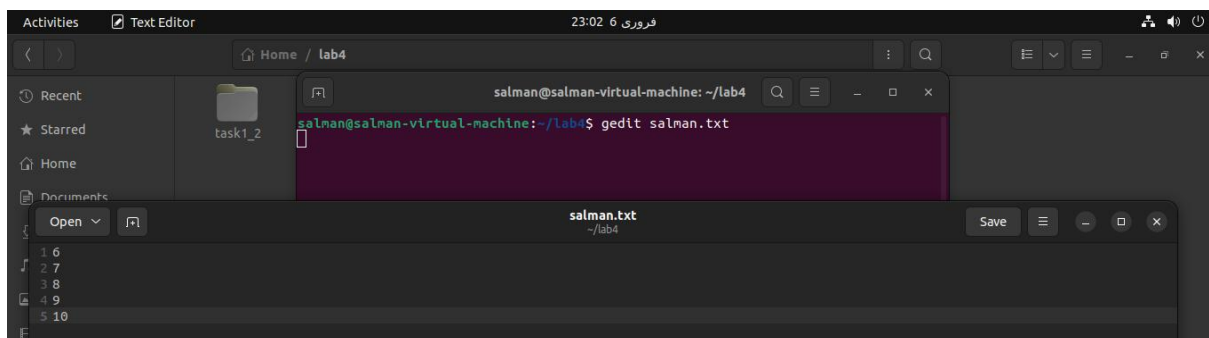

1. Create a file name “2021-SE-04.txt”

1. Go to directory.
2. Right click and open **Terminal**.
3. Execute “**gedit 2021_SE_04.txt**”.
4. Now enter the text you want to add in following file.
5. Press Ctrl+S and close the file.

2. Create a filename “salman.txt”

1. Open **Terminal** in same directory.
2. Execute “**gedit salman.txt**”
3. Now enter the text you want to add in following file
4. Press Ctrl+S and close the file.

3. Merge Data of both files (2021-SE-04.txt , salman.txt)

1. Execute “`cat 2021_SE_04 + salman.txt`”.
2. Now both content will be show in terminal.

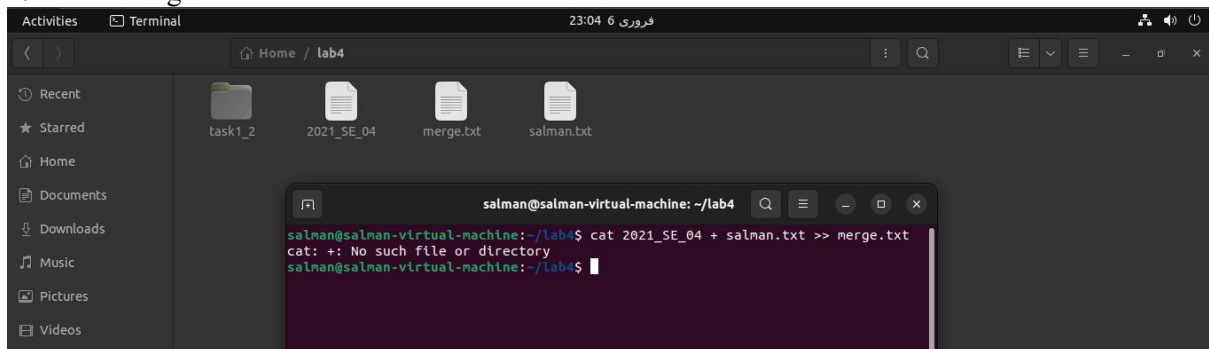

```
salman@salman-virtual-machine: ~/lab4
salman@salman-virtual-machine:~/lab4$ cat 2021_SE_04 salman.txt
1
2
3
4
5
6
7
8
9
10
salman@salman-virtual-machine:~/lab4$
```

4. Redirect the output

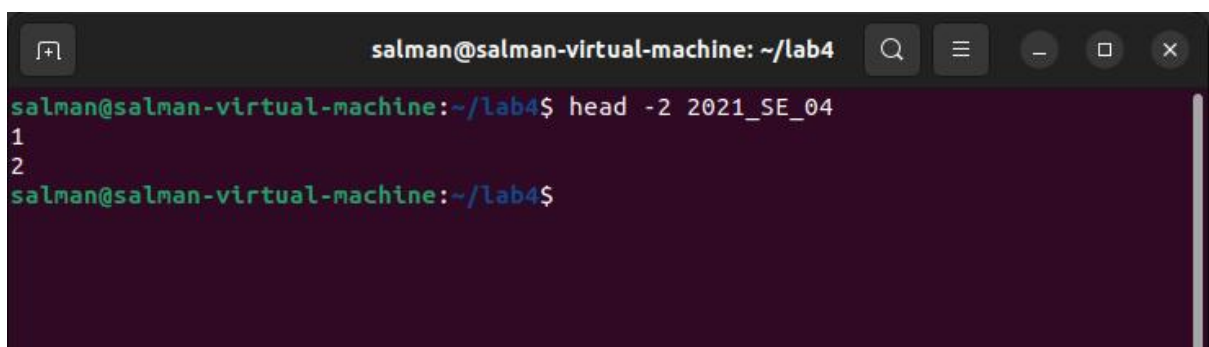

To Redirect we use “>”

1. Execute “`cat 2021_SE_04 + salman.txt > merge.txt`”
2. A new merge.txt file will be create

5. First two lines

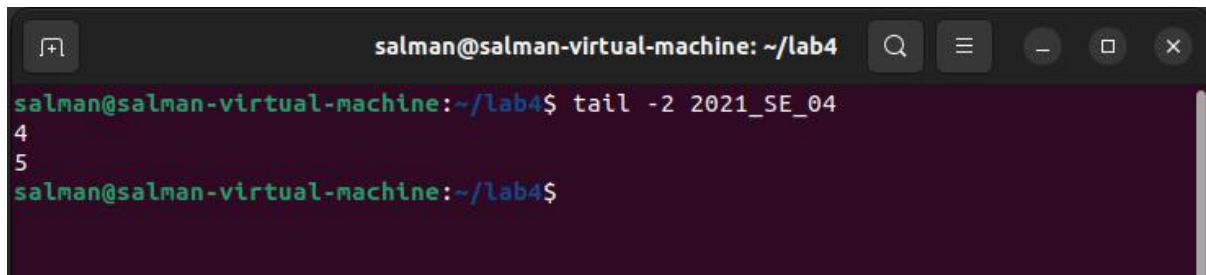

Execute “`Head -2 salman.txt`”, it will display first 2 lines of the file.

```
salman@salman-virtual-machine: ~/lab4
salman@salman-virtual-machine:~/lab4$ head -2 2021_SE_04
1
2
salman@salman-virtual-machine:~/lab4$
```

6. Last two lines

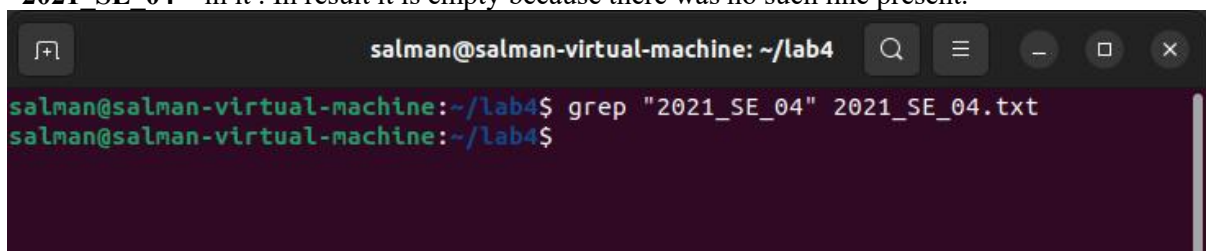

Execute “**Head -2 salman.txt**”, it will display first 2 lines of the file.

```
salman@salman-virtual-machine: ~/lab4
salman@salman-virtual-machine:~/lab4$ tail -2 2021_SE_04
4
5
salman@salman-virtual-machine:~/lab4$
```

7. Finds the string

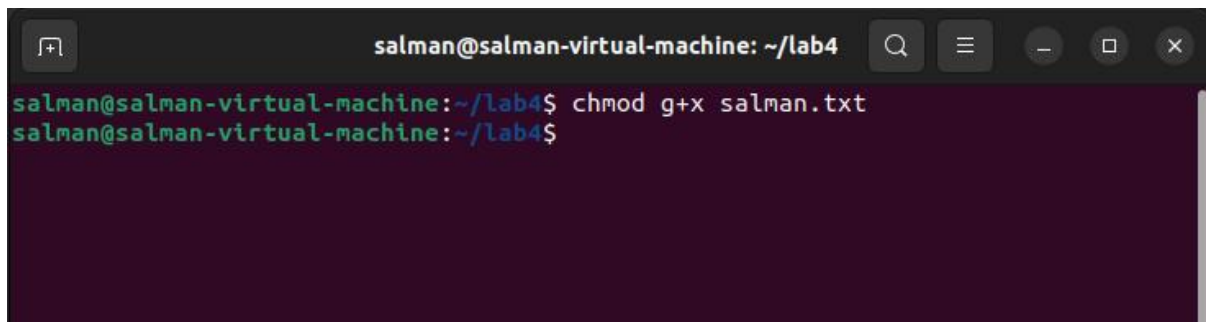

Execute “**grep “2021_SE_04” 2021_SE_04.txt**” it will start displaying all the line having “2021 SE 04” in it . In result it is empty because there was no such line present.

```
salman@salman-virtual-machine: ~/lab4
salman@salman-virtual-machine:~/lab4$ grep "2021_SE_04" 2021_SE_04.txt
salman@salman-virtual-machine:~/lab4$
```

8. Execute permission

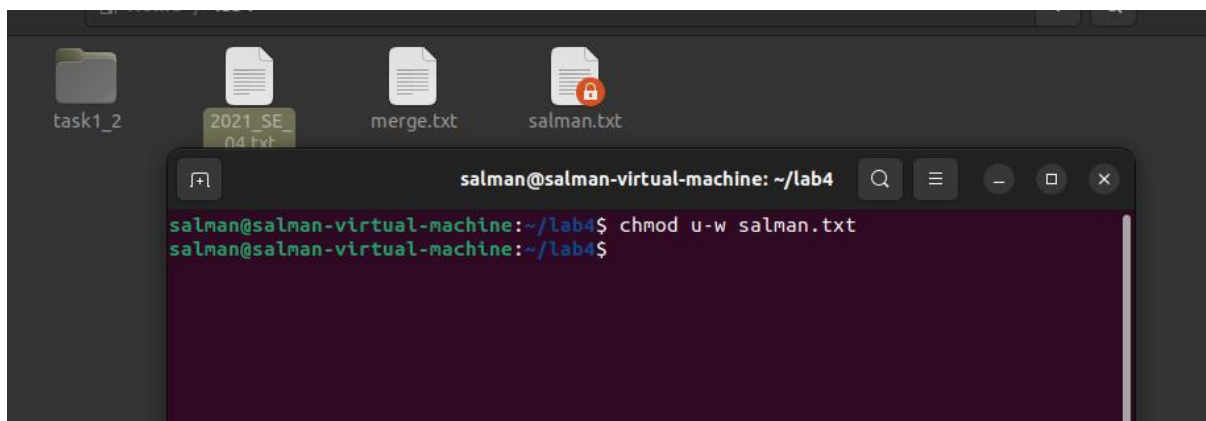

Execute **chmod g+x salman.txt** to grant the execute permission of the second file to the group .

```
salman@salman-virtual-machine: ~/lab4
salman@salman-virtual-machine:~/lab4$ chmod g+x salman.txt
salman@salman-virtual-machine:~/lab4$
```

9. Write permission

Execute “**chmod u-w salman.txt**” to remove the Write permission of the second file to the owner .

```
salman@salman-virtual-machine: ~/lab4
salman@salman-virtual-machine:~/lab4$ chmod u-w salman.txt
salman@salman-virtual-machine:~/lab4$
```

10.Current location

Exceute “**pwd**” command in terminal to get current location of present working directory.

11.List of all files present in the Desktop directory

Exceute follwing two commands in given sequence:

“**cd Desktop**”

“**ls**”

12.Create a folder

Excecute bellow line to make a folder in desktop

“**mkdir 2021_SE_04**”

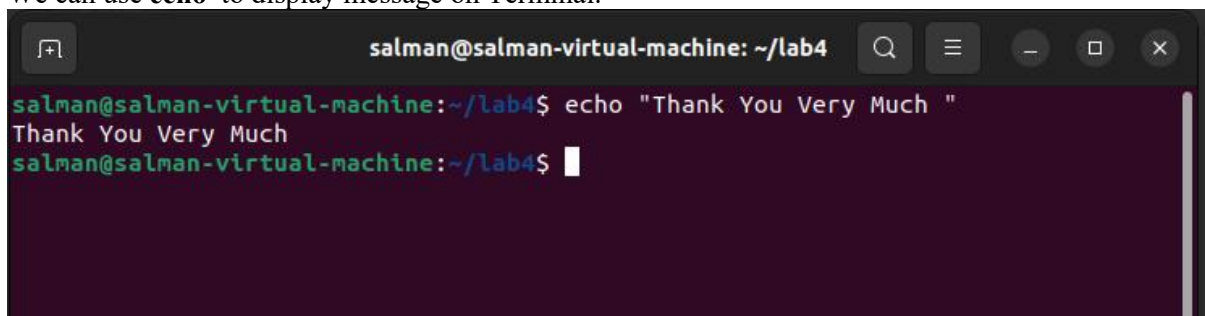

13.Display the Time.

Exceute following command to get current data time

“**date**”

14.Display a thank you message

We can use **echo** to display message on Terminal.

A screenshot of a terminal window titled "salman@salman-virtual-machine: ~/lab4". The terminal shows the command "echo 'Thank You Very Much '" being entered and executed. The output "Thank You Very Much" is displayed on the next line. The prompt "salman@salman-virtual-machine:~/lab4\$" is visible at the bottom of the terminal window.

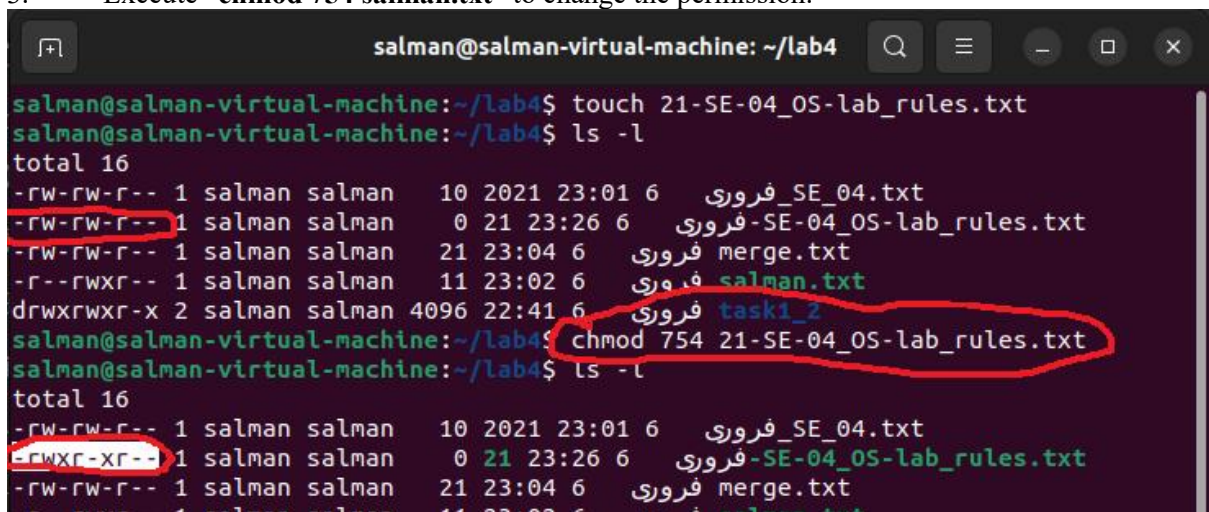

```
salman@salman-virtual-machine: ~/lab4
salman@salman-virtual-machine:~/lab4$ echo "Thank You Very Much "
Thank You Very Much
salman@salman-virtual-machine:~/lab4$
```

TASK 4

1. Create a file using **Touch** command.

2. Now to change file Permission to “- **rwX r-x r--**” we will use the following rules and create a **chmod** command.
 - a) For all Where r,w or x is present replace with 1 else 0.
 - b) Now convert 3 digits binary into decimal number
 - c) Here we get 7,5,4 that is our required Code
3. Execute “**chmod 754 salman.txt**” to change the permission.

4. To appened **ls** content in the file, execute this command “**ls >> 21-SE-04 OS-lab_rules.txt**”
